## Technical Expertise

- Successfully built and deployed number of IVR applications and VoIP dialers on **Asterisk** ( [www.asterisk.org](http://www.asterisk.org) ) for many organizations.
- 3+ years of experience in **python** programming in areas of **multimedia, networking, and GUI.**
- Hands on experience in configuring and trouble-shooting VoIP networks (**SIP, RTP**) and routers (Cisco, Linksys, Motorola)
- Strong in OOP paradigm - my language of choice is python.

Skill Set	
Languages	<b>Python, C, XML, HTML</b>
OS	GNU/Linux (Debian) , Windows Vista, winXP,
Databases	PostgreSQL , MySQL
Networking	Twisted (Python ) ( <a href="http://www.twistedmatrix.com">www.twistedmatrix.com</a> ),
VoIP Technologies	Asterisk, SIP, RTP
Web Frame Works	django ( <a href="http://www.djangoproject.com">www.djangoproject.com</a> ), Zope, Plone.

## Education

- Bachelor of Technology in Electronics & Communications from JNTU university

## Products & Projects

- Built XML webAPI for configuring asterisk and to build robust IVRs. This API is been successfully used in RadioMirchi project
- Built inbound IVRs for RadioMirchi (India Times group ) and deployed it in 22 radio stations across India.
- Built Office Inbound IVR for CaribServe <http://www.caribserve.net>
- Built Dialers, Inbound & outbound IVRs for Torque <http://torque.co.in>

I here by declare that above given information is true to the best of my knowledge.
